

Grade 3

Adopted 2019

Forces and Interactions

- 3-PS2-1.** Plan and conduct an investigation to provide evidence of the effects of balanced and unbalanced forces on the motion of an object. [3-PS2-1](#)

- 3-PS2-2.** Make observations and/or measurements of an object's motion to provide evidence that a pattern can be used to predict future motion. [3-PS2-2](#)

- 3-PS2-3.** Ask questions to determine cause and effect relationships of electric or magnetic interactions between two objects not in contact with each other. [3-PS2-3](#)

- 3-PS2-4.** Define a simple design problem that can be solved by applying scientific ideas about magnets. [3-PS2-4](#)

Interdependent Relationships in Ecosystems: Environmental Impacts on Organisms

- 3-LS2-1.** Construct an argument that some animals form groups that help members survive. [3-LS2-1](#)

- 3-LS4-1.** Analyze and interpret data from fossils to provide evidence of the organisms and the environments in which they lived long ago. [3-LS4-1](#)

- 3-LS4-3.** Construct an argument with evidence that in a particular habitat some organisms can survive well, some survive less well, and some cannot survive at all. [3-LS4-3](#)

- 3-LS4-4.** Make a claim about the merit of a solution to a problem caused when the environment changes and the types of plants and animals that live there may change. [3-LS4-4](#)

Inheritance and Variation of Traits: Life Cycles and Traits

- 3-LS1-1.** Develop models to describe that organisms have unique and diverse life cycles but all have in common birth, growth, reproduction, and death. [3-LS1-1](#)

- 3-LS3-1.** Analyze and interpret data to provide evidence that plants and animals have traits inherited from parents and that variation of these traits exists in a group of similar organisms. [3-LS3-1](#)

- 3-LS3-2.** Use evidence to support the explanation that traits can be influenced by the environment. [3-LS3-2](#)

3-LS4-2. Use evidence to construct an explanation for how the variations in characteristics among individuals of the same species may provide advantages in surviving, finding mates, and reproducing. 3-LS4-2

Weather and Climate

3-ESS2-1. Represent data in tables and graphical displays to describe typical weather conditions expected during a particular season. 3-ESS2-1

3-ESS2-2. Obtain and combine information to describe climates in different regions of the world. 3-ESS2-2

3-ESS3-1. Make a claim about the merit of a design solution that reduces the impacts of a weather-related hazard. 3-ESS3-1

Engineering Design

3-5-ETS1-1. Define a simple design problem reflecting a need or a want that includes specified criteria for success and constraints on materials, time, or cost. 3-5-ETS1-1

3-5-ETS1-2. Generate and compare multiple possible solutions to a problem based on how well each is likely to meet the criteria and constraints of the problem. 3-5-ETS1-2

3-5-ETS1-3. Plan and carry out fair tests in which variables are controlled and failure points are considered to identify aspects of a model or prototype that can be improved. 3-5-ETS1-3
