 4. Argue how all individuals can act as local, national, and/or global agents of social change by using lessons learned from history. **H.IG.4**

Geography

1. Identify the characteristics of populations based on their size, place, region, and cultural demographics, as well as identifying patterns of migration. **H.HSP.1**
 2. Explain how and why a population's characteristics, including their spatial distribution, growth, and movement, have divided, organized, and unified areas of Earth's surface and impacted both human and physical systems. **H.HSP.2**
 3. Analyze how human systems and the distribution of populations interact with and impact physical systems, and how conflict and access to resources influence physical systems. **H.HSP.3**
 4. Argue how the relationship between populations and physical systems influence decision-making about the equitable access to resources and land at the local, regional, and/or global levels. **H.HSP.4**
1. Identify the characteristics of human systems, physical systems, and the environment, and ways they interact at local, regional and/or global levels. **G.HPE.1**
 2. Explain how humans and their societies and institutions affect, modify and/or preserve the environment, as well as how the modifications of the physical environment affect physical, behavioral, and diverse cultural systems. **G.HPE.2**
 3. Analyze how individuals and societies at local, regional and/or global levels influence political, economic, and social decision-making. **G.HPE.3**
 4. Argue how decisions about resources and the environment made by individuals and/or communities impact current and future peoples differently and how those decisions might be made more equitable. **G.HPE.4**
1. Identify maps, globes, and other geographic tools and technologies that are used to describe where places are located both absolutely and relatively across time, space, and distance. **G.WST.1**
 2. Explain how the characteristics and elements of maps, globes, geographic tools, and other technologies are used and selected to identify and describe local, regional and/or global locations. **G.WST.2**
 3. Analyze multiple types of maps, charts, and graphs and how they are used to interpret topographical information, draw inferences about the development of societies, and determine how places shape events and how places may be changed by events. **G.WST.3**
 4. Argue how the systematic analysis of the spatial patterns provides an integral understanding of a place or region and supports equitable decisions about climate and land use. **G.WST.4**

Economics

1. Identify the choices communities make about how to use resources based on the scarcity of that resource, including those that are familiar and unfamiliar. [E.SA.1](#)
 2. Explain how scarcity affects the cost and availability of desired goods and services, and who has the power to influence the factors related to cost and availability and why. [E.SA.2](#)
 3. Analyze how decisions affecting access to goods and services are influenced by systems of power and cultural norms including how these effects of decisions create more equitable or inequitable outcomes. [E.SA.3](#)
 4. Argue how a resource can be used differently to create a more equitable outcome for individuals and communities including how individuals and communities can influence systems of power to achieve that change. [E.SA.4](#)
1. Identify the individuals and communities involved in the production of any good or service, the materials needed for producing them, where and how the materials are obtained, and the various interrelationships among all of these elements. [E.PC.1](#)
 2. Explain who has the power to make decisions related to the means of production and the effects those decisions have on individuals and communities [E.PC.2](#)
 3. Analyze how individuals and communities acting through intersectional identities and lived experiences can affect the means of production. [E.PC.3](#)
 4. Argue whether the costs and benefits of an aspect of the means of production equitably serve all individuals and communities. [E.PC.4](#)
1. Identify the ways that different political systems utilize economic systems to organize and distribute goods and services to individuals and communities. [E.EG.1](#)
 2. Explain how those traditionally privileged and marginalized across intersecting identities can influence and interact with economic systems. [E.EG.2](#)
 3. Analyze how inequities within the economic system have been addressed or sustained by the actions of those traditionally privileged and marginalized. [E.EG.3](#)
 4. Argue how different economic systems can create more equitable outcomes for individuals and communities, particularly for those traditionally marginalized from the economic system. [E.EG.4](#)
